

# Instructions for Making a 3D Paper Giraffe

1. Cut along the solid black lines around the edge of the three giraffe parts.
2. Next, fold down the dotted lines to create hill folds.
3. Fold up the dashed and dotted lines to create valley folds.
4. Apply glue to tab 1 and stick this to the leg section on the opposite side. This should begin to form the giraffe's lower body shape.
5. Apply glue to tabs 2 and 3 and stick these to the back of tab 11.
6. Apply glue to tabs 7 and 8 and stick these to the back of tab 4.
7. Take the neck part and apply glue to tab 9. Then, stick this to the section on the opposite side. This should begin to form the giraffe's neck.
8. On the neck, apply glue to tabs 5 and 6. Place these tabs in the gaps at the top of the body section, then stick them down.
9. Apply glue to tab 11 and attach this to the corresponding section on the neck.
10. Finally, apply glue to tab 10 and stick this down inside the top of the neck to complete your giraffe.
